PROFESSIONAL SUMMARY

AI & Machine Learning Engineering student (B.Tech, 2027) with hands-on experience from three internships across machine learning, generative AI, and data analytics. Built end-to-end projects such as **NeuroTwin AI**, a RAG-powered digital twin with long-term memory, and a **Mutual Fund Analytics** platform processing 46K+ NAV records, using Python, FastAPI, LangChain, SQL, and Power BI. **GATE 2026** qualified in Data Science & AI. Seeking an entry-level AI/ML or Data Science role to build practical, data-driven solutions.

EDUCATION

Bachelor of Technology (B.Tech) — Artificial Intelligence & Machine Learning Jul 2023 – Jun 2027
A.P.J. Abdul Kalam Technical University, Lucknow

SKILLS

Machine Learning, AI & Data Science: Supervised & Unsupervised Learning, NLP, Deep Learning, Generative AI, LLMs, RAG, Prompt Engineering, Transformer Models, Feature Engineering, Model Evaluation, Exploratory Data Analysis (EDA)

Programming Languages: Python, C, C++, Java

ML/DL Frameworks & Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, XGBoost, CatBoost, LightGBM, SHAP, Optuna, OpenCV, MediaPipe, ONNX Runtime, Matplotlib, Seaborn

Web, APIs & Backend: Flask, FastAPI, Streamlit, SQLAlchemy, React, Docker

Data, Databases & BI: SQL, PostgreSQL, SQLite, ChromaDB, Power BI, Tableau, Excel

LLM / Generative AI Tools: LangChain, Google Gemini API

Version Control & Tools: Git & GitHub, Jupyter Notebook

Languages: English, Hindi

Currently strengthening: Data Structures & Algorithms in C++ (LeetCode practice).

EXPERIENCE / INTERNSHIPS

Decode Labs Jul 25 – Aug 25, 2026
Artificial Intelligence Intern (Virtual) · Remote

- Built a rule-based AI chatbot handling greetings and exit commands, using if-else control flow within a continuous interaction loop.
- Built a basic data classification model on a small dataset, covering data loading, train/test splitting, and applying a supervised classification algorithm.
- Built a simple AI-based recommendation system that matched user-input preferences using similarity logic and displayed the recommended items.

Bluestock Fintech Jun 20 – Aug 20, 2026
Data Analyst Intern · Remote · Lucknow, Uttar Pradesh, India

- Analyzed mutual fund and investment data as part of a Data Analyst internship focused on fintech analytics.
- Performed data cleaning and exploratory data analysis (EDA) using Python, SQL, and Pandas to prepare investment data for reporting.
- Built a Mutual Fund Analytics Dashboard in Power BI, visualizing fund performance, risk metrics, and ML-based recommendations (capstone detailed under Projects).

Ei Systems Jun 15 – Aug 10, 2026 (8 weeks)
Python with Machine Learning Intern · Remote · Lucknow, Uttar Pradesh, India

- Built machine learning solutions in Python over an 8-week internship, applying core ML algorithms and programming techniques.
- Collaborated with a team to explore and implement ML-based solutions supporting the organization's technology initiatives.
- Completed a project on an AI Resume Screening & ATS Analyzer using NLP and Generative AI techniques, submitted as the internship's capstone report.

PROJECTS

NeuroTwin AI — Intelligent Digital Twin
Stack: *React, FastAPI, Python, LangChain, Gemini, ChromaDB, PostgreSQL*

- Built an AI-powered digital twin with **long-term memory, RAG, AI chat, document understanding, and multi-agent capabilities**.
- Implemented authentication, digital twin profiles, memory management, document indexing, and conversational AI.
- Deployed the frontend on **Vercel** with a production-ready FastAPI backend architecture.

Bluestock Mutual Fund Analytics

Stack: *Python, SQL, Power BI, Flask, Pandas, SciPy*

- Built an end-to-end fintech analytics platform processing 46K+ NAV records and 32.8K transactions.
- Implemented CAGR, Sharpe, Sortino, Alpha, Beta, Max Drawdown and VaR/CVaR analysis.
- Created a 4-page interactive Power BI dashboard with risk-based fund analysis.

AI Mood Analytics & Music Recommendation

Stack: *Python, OpenCV, DeepFace, MediaPipe, Streamlit*

- Developed real-time face, age, gender and emotion detection.
- Added emotion-based music recommendations, screenshots, video recording and analytics export.

AI Resume ATS

Stack: *Python, NLP, FastAPI/Flask, React*

- Built an AI-based resume analyzer for ATS scoring, skill extraction and job-description matching.
- Generated actionable recommendations to improve resume relevance.

Spam Email/SMS Classifier

Stack: *Python, NLP, Scikit-learn, Flask*

- Developed an ML-based spam detection system using TF-IDF and Linear SVM.
- Deployed the prediction API as a web application.

Customer Churn Prediction

Stack: *Python, Pandas, Scikit-learn, Power BI*

- Built ML models to predict customer churn using Logistic Regression, Decision Tree, Random Forest and Gradient Boosting.
- Performed EDA and identified key factors influencing customer retention.

Movie Recommendation System

Stack: *Python, Pandas, Scikit-learn*

- Developed a content-based movie recommendation system using similarity-based techniques.
- Recommended movies based on user-selected titles and movie features.

ACHIEVEMENTS

- GATE 2026 — Qualified in Data Science & Artificial Intelligence (DA)

CERTIFICATIONS

- Google AI Essentials Specialization (5 courses) — Google / Coursera — Jul 2026
- Oracle Certified Foundations Associate — Agentic AI — Oracle University — Aug 2026
- Getting Started with Generative AI — IBM SkillsBuild — Jul 2026
- Data Science Job Simulation — BCG X (via Forage) — Aug 2026
- Quantitative Research Job Simulation — JPMorgan Chase & Co. (via Forage) — Jul 2026
- Data Analytics Job Simulation — Deloitte (via Forage) — Jul 2026
- GenAI Powered Data Analytics Job Simulation — Tata (via Forage) — Aug 2026
- Machine Learning with Python (~300 hrs), Developer Certification — freeCodeCamp — Jul 2026
- Data Analysis with Python (~300 hrs), Developer Certification — freeCodeCamp — Jul 2026
